

Axis & Allies Global 1940 House Rules Expansion

STRATEGY GUIDE

ANZAC

From Australian territories ANZCAC units must keep fighting aggressively against the overwhelming Japanese forces.

As the “Outpost” of the Commonwealth & British Empire, it is crucial that ANZAC stays in the fight in order to disrupt Japanese expansion into the Pacific.

This *Strategic Plan* for ANZAC described below is based on a War effort combined with the *Strategic Plans* of the United States and the United Kingdom.

The goal is to wear down the Japanese units, by gradually increasing the pressure on Japanese supply lines – simply by destroying Japanese *Transport* units whenever possible.

With ANZAC's limited production capacity, the *Minor Industrial Complex* in *Sydney* should be upgraded to *Heavy Industry 1 Unit* as soon as the ANZAC economy allows for an increased production.

Transport units and *Infantry* units must be produced in high numbers from *Early 1940* until *Late 1941*, in order to capture some of the Dutch islands.

The *Early 1940* scenario described below, assumes that ANZAC and the United Kingdom are not yet at War with Japan:

War of Attrition:

This strategy will include offensive operations that will be launched in *The Pacific Theatre*.

Early 1940 (game start): starting income: 10 IPC

In *Early 1940* ANZAC purchases:

- 1 Transport unit (6 IPC)

Total IPC cost: 6 IPC

Savings: 4 IPC

Early 1940 Non-Combat Movement:

- 1 Transport unit moves from sz 62 w/2 Infantry units to sz 42 and offloads into *Java*
- 1 Cruiser unit moves from sz 63 to sz 54
- 1 Infantry unit moves from *Guinea* to *Dutch New Guinea*
- 2 Fighter units move from *New Zealand* to *Queensland*
- 1 Destroyer unit moves from sz 62 to sz 54
- 2 Infantry units move from *Queensland* to *New South Wales*
- 1 Artillery unit moves from *Queensland* to *South Australia*

Note:

ANZAC units in *Egypt* & *Malaya* must stay there until the Axis Nations have revealed their strategies.

Early 1940 Place New Units:

- 1 Transport unit is placed in sz 62

Early 1940 Collect Income:

- ANZAC has taken over *Java* (4 IPC)
- ANZAC has taken over *Dutch New Guinea* (2 IPC)
- ANZAC collects 16 IPC
- Total income: 20 IPC

Future ANZAC preparations:

In *Late 1940* and *Early 1941* ANZAC should mainly focus on a *Buildup* of Transport units & Infantry units in *Sydney*.

ANZAC War Production must be coordinated with the United Kingdom strategy in the Pacific – and should mainly focus on fortification of ANZAC held islands – and harassments against Japanese Transport units in the Southern Pacific.

Important:

ANZAC units should also take control of *Celebes*
Those islands under ANZAC control must be
continuously reinforced with *Infantry* units – and
fortified with *Bunkers* – for as long as possible.

ANZAC *Fighter* units should move to *Malaya & India*, to strengthen the United Kingdom defense –
and to be able to threaten Japanese supply lines
(*Transport* units).

ANZAC should gradually produce a limited number
of *Submarine* units in order to threaten and
eliminate Japanese *Transport* units.
