no idea what you are talking about cmdr jennifer,
TripleA requires "AT LEAST" Java 1.5 (also called Java 5)
I do not recommend using java 5, because java 5 does not support changing the look and feel.
Currently I am using Java 7 on my computer for the last 6 months. Previous to that I was using Java 6.
TripleA runs just fine on both java 7 and java 6.

...
Windows 7 64 bit
...
TripleA Version 1.6.1.4

On my Windows 7 64bit system I have the latest Java 7 Update 21 (64bit) installed, running triplea 1.6.1.4 on it (having no other program that needs 32bit JRE).
I have never experienced any issues with (up-to-date) JRE on my older systems, either.

I just want to play!
