

# AXIS & ALLIES COLD WAR VERSION

**Time Period** - Throughout the Cold War many instances broke out where there almost was war. In this special version of Axis and Allies the once powerful nations of Japan and Germany are occupied by the victorious Allies. Germany has been carved up into zones of British, French, Soviet, and American occupation and the islands of Japan are under direct US rule. The bloody conflict of WWII has ended with a single bomb. The Soviet spies in America quickly realized the importance of this device and have brought the plans home. Both the Soviet Union and America can now build Nuclear weapons. We also see the creation of a Jewish state, Israel however the Muslim population of the Middle East is outraged and now blames America for these invaders. Unfortunately the peace is also broken by a global communist movement. It has sent a shockwave of scares all throughout the ranks of the western allies who now race to prevent this new ideology from spreading. This variant runs along the basis that America declares war on China shortly after the Korean War because of having aided militarily.

## **Political Situation** -

**America** - After the Second World War it became increasingly apparent that the Soviet Union was attempting to expand its influence, the US could not sit and watch so they adopted a strict no communism policy. They are however at least for now going to wait for the Soviets to attack first. The Anti American Middle Eastern countries are a much bigger threat to the government right now because they could lock down all Middle Eastern Oil. The Chinese have recently began aiding the North Koreans fight against the US which forces the US to declare war. The US is the leader of NATO and their decisions will be followed by the rest of NATO. The US starts at war with China and the Anti American Arab Countries. They can declare war on the Soviet union only if provoked by an attack on the US or one of its allies or if Warsaw pact countries enter NATO land for any reason. Additional restrictions: While not at war with the Soviet Union they can't move troops into non-Nato spots in Europe or Africa, they can however move into non-Nato asian countries because a state of war between them and China exists.

**Soviet Union** - The USSR is attempting to spread its ideology everywhere it can but they are weary of a European war, and don't want to tempt America because they are keenly aware of their massive nuclear arsenal. The same treaty's don't apply to the remote countries of the world and the USSR starts at war with the anti communist countries in Africa and Asia. They can declare war on anyone else any time.

**England** - The United Kingdom is a shell of its former empire. They have adopted an anti communist policy just like their American allies and share interests with them as well. The threat of Chinese and Anti American Countries looms over them every day.

# AXIS & ALLIES COLD WAR VERSION

They are members of NATO and will be protected if war is declared on them. The UK starts at war with China and they can declare war on the Anti American Arab Countries and the Soviet Union at any time however will not receive support from America if they attack the Soviet Union. Additional restrictions: While not at war with the Soviet Union they can't move troops into non-Nato spots in Europe or Africa, they can however move into non-Nato asian countries because a state of war between them and China exists.

China - China has recently emerged as one of the world's superpowers. The ambitious militaristic goals have however not gone unnoticed and a strong coalition has been formed against China. China starts at war with America, England, France, Australia, Italy, and the Anti Communist Asian countries. They can declare war freely but will not affect relations with the Soviet Union and Nato.

France - France was badly damaged through the course of WWII and now their empire is collapsing everywhere. The government fears a communist takeover so they support the western allies as much as possible. They are members of NATO and will be protected if war is declared on them. France starts at war with China and can declare war on The Anti American Arab Countries and the Soviet Union freely but if they deviate from America's goals they will fight alone. Additional restrictions: While not at war with the Soviet Union they can't move troops into non-Nato spots in Europe or Africa, they can however move into non-Nato asian countries because a state of war between them and China exists.

Australia - Australia bravely fended off the Japanese attacks in WWII and now that China becomes aggressive they feel once again threatened by a larger force. They fear if China is victorious the entire pacific will fall and they will be next. Australia starts at war with China and they can declare war on the Anti American Arab Countries and the Soviet Union freely however will not receive support from America and its allies if they don't follow America's lead.

Anti Communist Asian Countries - The Anti Communist Asian Countries are starkly aware of the situation. Their entire existence depends on their resisting the communist assaults. Their goals are all nationally based and do not care about anything outside of Asia. The ACAC start at war with China and the Soviet Union and cannot declare war on anyone else.

Spanish Speaking Countries - These nations are all that is left of a once strong Spanish Empire. They are members of NATO and will be protected if war is declared on

# AXIS & ALLIES COLD WAR VERSION

them. They can declare war freely but the Western Allies will not come to their aid if they don't share the same enemy. Additional restrictions: While not at war with the Soviet Union they can't move troops into non-Nato spots in Europe or Africa, they can however move into non-Nato asian countries if a state of war between them and China exists.

Anti Communist African Countries - The Anti Communist African Countries are doing everything they can to stay in power and defend against the Communist threat. Their goals are all nationally based and they do not care about anything that happens outside of Africa. The ACAFC start at war with the Soviet Union and cannot not declare war on anyone else.

Scandinavian Countries - The Scandinavian Countries are members of NATO and will be protected if war is declared on them. They can declare war freely but the Western Allies will not come to their aid if they don't share the same enemy. Additional restrictions: While not at war with the Soviet Union they can't move troops into non-Nato spots in Europe or Africa, they can however move into non-Nato asian countries if a state of war between them and China exists.

Anti American Middle Eastern Countries - The Anti American Arab Countries have been invaded by the imperialist Americans who occupy their land and give it to the Jews. They can not stand for this and have united in an effort to win back their holy land through war. The AAMEC start at war with America and can declare war freely but won't receive help from the Soviets and their allies unless they share enemies.

Italy - After WWII Italians were sick of their allies and gladly joined NATO. They will be protected if war is declared on them. They even aid the NATO coalition against communist China. Italy starts at war with China. They can declare war freely but will not receive support unless they share enemies. Additional restrictions: While not at war with the Soviet Union they can't move troops into non-Nato spots in Europe or Africa, they can however move into non-Nato asian countries because a state of war between them and China exists.

Canada - Canada exists in the shadow of America, they adopt many of the same policies as them and also joined NATO. They will be protected if war is declared on them. Canada starts at war with no one but can declare war freely however if they don't follow NATO's lead they will not be supported in their attack. Additional restrictions: While not at war with the Soviet Union they can't move troops into non-Nato spots in

# AXIS & ALLIES COLD WAR VERSION

Europe or Africa, they can however move into non-Nato asian countries if a state of war between them and China exists.

Taiwan - After the Communists took over China, Chiang Kai-Shek and his nationalist forces retreated to Taiwan. The US realizes the strategic value of Taiwan and keeps a permanent military force to help with their defence but even these troops cannot compare to the armies of China, and if they come to finish the job there is little chance of survival.

**Winning the Game** - The Allies win the game if they control Cairo, Moscow, Shanghai, Berlin, and Warsaw while still controlling Paris, London, and Washington. The Communists win the game if they control 10 enemy cities while still controlling Moscow, Shanghai and Berlin.

**New Technologies** - The end of WWII led to many technological advancements such as the atom bomb here is a list of them and what they cost.

- Researching - Not all the technologies are in practical use. To research one you pay the required icp price to the bank and now have the technology. You can only research one time per turn.
- Atomic Bombs - Destroys everything in the targeted spot. Cost is 50 icp - research stages required - heavy bombers, nuclear fission, nuclear bomb \*Soviet Union and America do not have to research them.
- Heavy Bombers - The Bombers defence is raised to 2 and it can fly 7 spots instead of 6. Research price - 30 icp
- Nuclear Fission - Raises total icp by 3 every turn. Research price - 40 icp
- Nuclear Bomb - Final stage in atomic bomb development allows building of atomic bombs. Research price - 50 icp
- Heavy Tank - New modern tanks that have an attack and defence of 4. Cost is 10 icp \*only countries that can build them is AAMEC, America, USSR, China, and England.

# AXIS & ALLIES COLD WAR VERSION

- Nuclear Missiles - Experimental technology that can make the Atomic bomb seem like a toy, its range is 10 spots from the air base you launch it from in all directions. It destroys everything in the targeted spot and that spot does not produce icp that round. Cost is 70 icp - research stages required - Missiles, nuclear fission, nuclear bomb, hydrogen bomb.
- Missiles - Deadly rocket that can be launched from air base. Range is 5, Attack is 4, Cost is 20 icp. Research price - 30 icp \*America and USSR don't need to research them.
- Hydrogen Bomb Destroys everything in the targeted spot and that spot does not produce icp for that round. Cost is 60 icp. Research price 60 icp
